Jackson County Seismicity Map

About the Map

This map illustrates the location and magnitude of reported earthquakes that have occurred in Jackson County, Arkansas from 1978 to Present. The data source for the earthquakes depicted on this map is derived from the Office of the State Geologist (OSG) earthquake catalog. The catalog has been compiled from various sources and publications and includes date, time, latitude, longitude, magnitude or intensity and depth information. Some event records may contain incomplete data due to their date and/or source. The OSG earthquake catalog is dynamic and continually updated as event parameters are modified, new events are added, and occasionally, events are deleted. The seismic areas/zones are derived from various geologic sources and publications on file at the OSG. Depicted seismic areas/zones, are for illustration purposes only and may not represent all the seismically active areas within a given location or relate to the origin of the earthquakes depicted on this map.

Jackson County (shaded in blue) is located inside the New Madrid seismic zone (NMSZ) catastrophic planning area (shaded in pink), as designated by the Arkansas Department of Emergency Management (ADEM) and also inside the Eastern Ozark Dome / Commerce Seismic Zone (red box). The NMSZ is shaded in purple.
